EDUCATION

Master of Science Candidate (Management of Technology)

May 2026

New York University (NYU), Tandon School of Engineering, Brooklyn, New York

GPA: 3.64/4

Coursework: Product Design, Design Strategies, Digital Marketing, Digital Strategy, Operations Management, Financial Analysis.

Bachelor of Technology (Computer Science and Engineering)

May 2020

Govt. Model Engineering College, Kerala, India

GPA: 3.38/4

SKILLS

Core Skills: Product Strategy, Product Design, User Research, Market Analysis, Product Marketing, Product Planning, Data Fluency.

Tools and Technologies: Jira, Confluence, Capital IQ, Statista, Factiva, LexisNexis, Microsoft Excel, AI/ML Models (LLMs, NLP Classifiers), C#, Python, C++, .NET, REST API, SQL, Azure Cloud, Lovable, Claude, Figma.

WORK EXPERIENCE

Technical Product Management Intern - Cyber Institute, New York

Sep 2025 - May 2026

- Managed the technical scoping and refinement of GUARDIAN, an AI-enabled governance tool leveraging a multi-model consensus engine to orchestrate 12 leading LLMs and quantum-enhanced routing, ensuring 95% accuracy in policy analysis.
- Engineered a targeted Go-to-Market (GTM) content strategy that translated GUARDIAN's patented scoring and AI accuracy into risk-reduction benefits, delivering a product roadmap for initial platform adoption.
- Conducted comprehensive market research and identified customer segments across complex B2G sectors including UN/NATO, national security, and developed a detailed Customer Journey Map to inform the GTM strategy and feature prioritization.
- Synthesized the qualitative and quantitative data from competitor analysis (competitive intelligence) and initial product state analysis with consumer insights to define the scope for UX/UI enhancements to drive initial platform adoption.

Summer Associate - Boston Strategies International, New York

Jun 2025 - Aug 2025

- Supervised a four-member team, managed project workflow using agile methodologies (Kanban), and led stakeholder management by presenting prioritized, data-backed insights and progress to senior leadership, ensuring alignment with strategic objectives during the revision of 'The Guide to Supply Chain Management' book.
- Conducted data analysis of financial and market information using Capital IQ, modernizing chapters, identifying supply-chain performance trends, and establishing industry benchmarks across 10+ companies, and determining the correlations between strategic supply chain choices and company financial growth over multiple years.

Technology Consultant - Microsoft, Hyderabad, India

Oct 2020 - Mar 2023

- Collaborated with cross-functional teams to contribute to the product life cycle of a B2B desktop application for a tax and advisory customer, leveraging Azure services and .NET Core within a test-driven development framework, supporting 100K users.
- Led the development of data synchronization APIs using .NET6 and Azure Functions that retrieved transaction records, reducing customer processing time by 40% and aligning technical outcomes with project management principles and user requirements.
- Partnered with product owners and designers to advance the product offering by creating new and enhancing existing value propositions through features compliant with International Standards on Auditing (ISAs) to enable consistent, high-quality audits across 5+ teams.
- Engineered customer-centric user journey mapping and custom authentication policies for an e-commerce site for a retail supermarket chain by utilizing Azure Active Directory B2C and refining engagement analysis with Python, contributing to a 20% increase in returning users while ensuring 100% adherence to defined user story acceptance criteria compliance.
- Analyzed the competitive landscape, customer behavior, and product insights to prioritize and define features that improved accessibility and increased user engagement.

PROJECTS

Product Manager, Smart Schedule App

Jan 2026 - May 2026

Managed the full product lifecycle for a Gen AI-powered scheduling app for students using Jira, Confluence, Figma and Lovable including creating user stories, managing the product backlog, and iteratively refining the prototype using user feedback.

Product Manager, RideShield

Mar 2025 - Apr 2025

Devised a multi-layered safety product ecosystem for ride-sharing platforms by integrating predictive risk mapping, fatigue forecasting, and real-time two-way safety protocols to align with user trust, platform feasibility, and business impact.

Product Manager, Solo Traveller's Paradise

Sep 2024 - Dec 2024

Designed the end-to-end product strategy and go-to-market execution for a verified community platform for solo travelers, conducting market research, designing user journeys, and developing a business model canvas to drive user adoption and retention.

Product Manager, Covid Monitoring System

Aug 2021 - Oct 2021

Launched a data-driven COVID-19 monitoring system using machine learning models that increased employee safety by 35%. Collaborated with clinicians and public health stakeholders to conduct user research and map provider reporting workflows, integrating real-time data collection into existing healthcare operations, accelerating outbreak detection by 40%.
